Acknowledgement

We have put a lot of effort in this Project. However, it would not have been possible without the kind support and help of our Course Instructor, Ms. Salas Akbar. I would like to extend my sincere thanks to her.

I am highly indebted to Bahria University for their guidance and constant supervision as well as for providing necessary information regarding the project & also for their support in completing the project.

I would like to express my gratitude towards my parents & faculty of BUKC for their kind co-operation and encouragement which help me in completion of this project.

I would also like to extend my sincere thanks to my friends for their constant moral support.

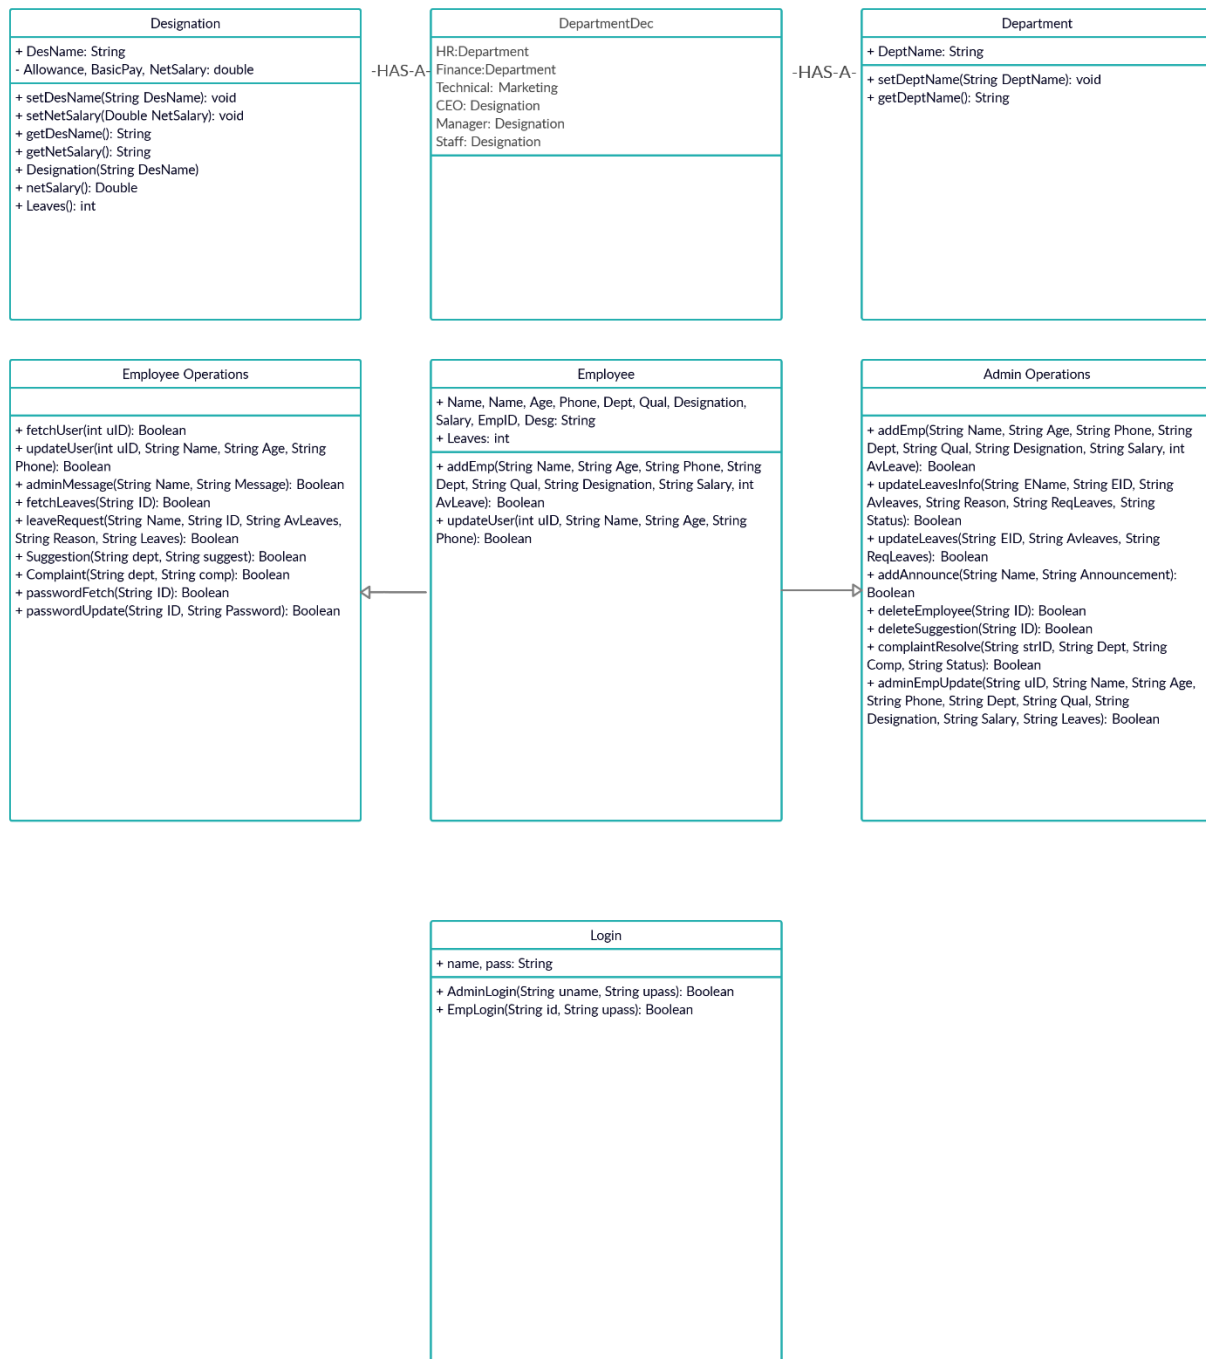

Introduction and Motivation

Employee Management System is used to store information and monitor different activities of Employees in a company. All of the data such as names, working hours, salary, amount of leaves and other details are stored through connection with a database. This System allows us to manage the employee data and track the employees. It increases the efficiency editing or managing data for not only the admin but employees. It is a really easy to use software that requires no special learning for the employee and the administrator both. It allows a company to register new employees, check their data like their Salary, their Position in the company, their Personal Data, how many Leaves that employee has based on their position/post in the company. This software also has an administrative panel where the admins or managers can add employee data, delete employee data, make changes to salaries like changes how allowance or taxes etc., and changes in their posts/positions like promoting or demoting them. This particular system that we have created, consists of 2 roles for the user login: Administrator and employee. Admin role allows you to add, edit, delete, and search employees' and their particular data. It also allows the users to modify some of the information such as the bonus/allowances and the job position i.e. allowing them to promote their position to a higher one. These are some of the features of our program.

Our motivation for this project is to make it so that the paper-based management is replaced by an enhanced, digital and more efficient way of employee management. This method reduces the cost and hassle of maintaining a hard copy inefficient management method. This allows the company to keep exact track of their employees and even communicate through digital means instead of physical or classical means of communications like Notices, Hard Copy Mails etc.

UML

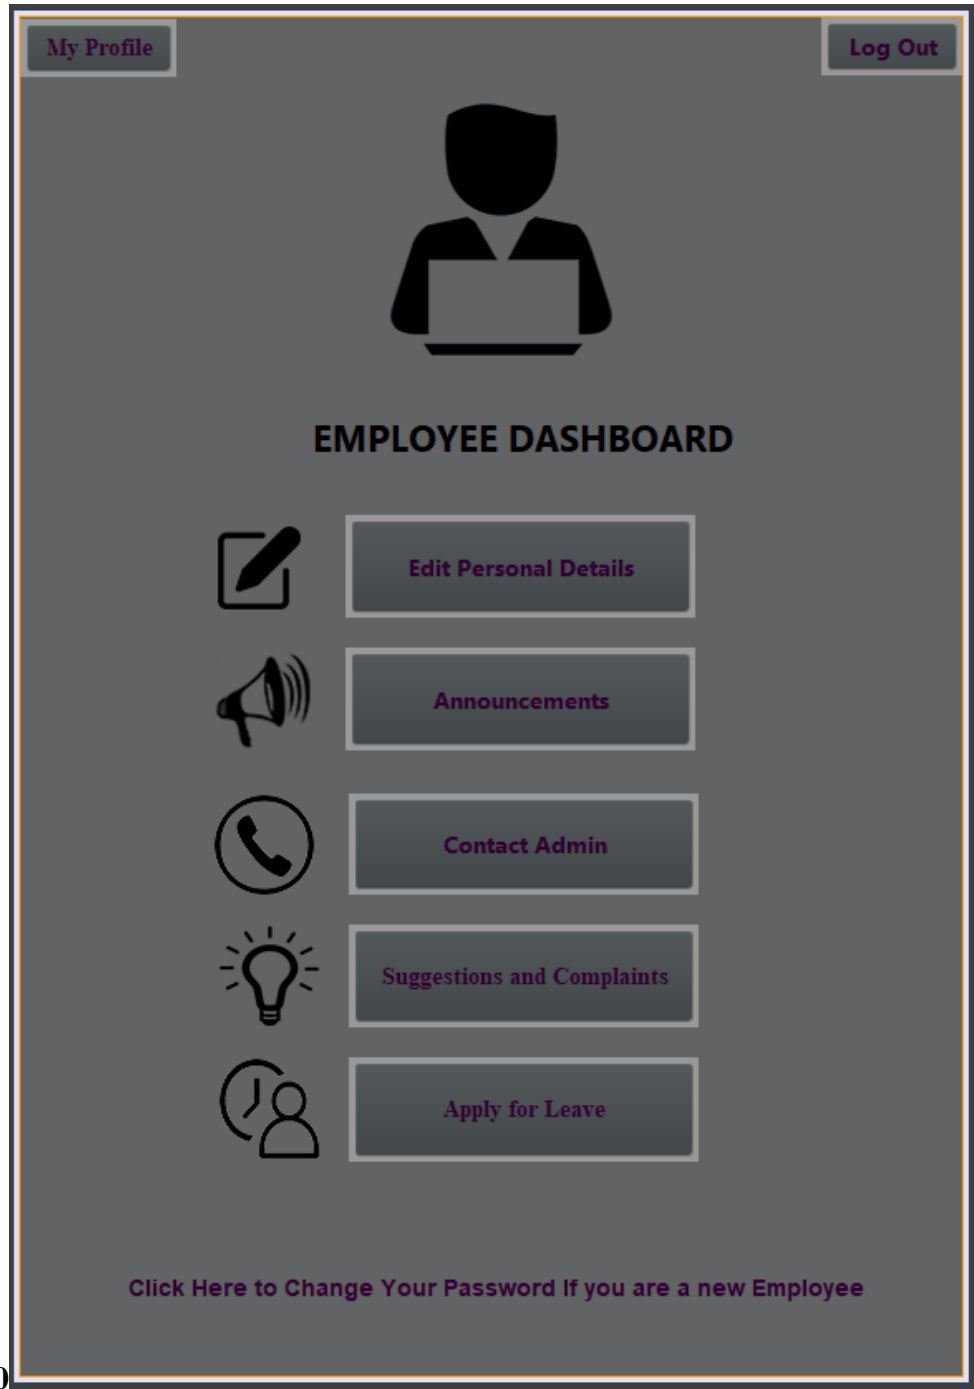

PROJECT DESIGN

LoginForm.java:

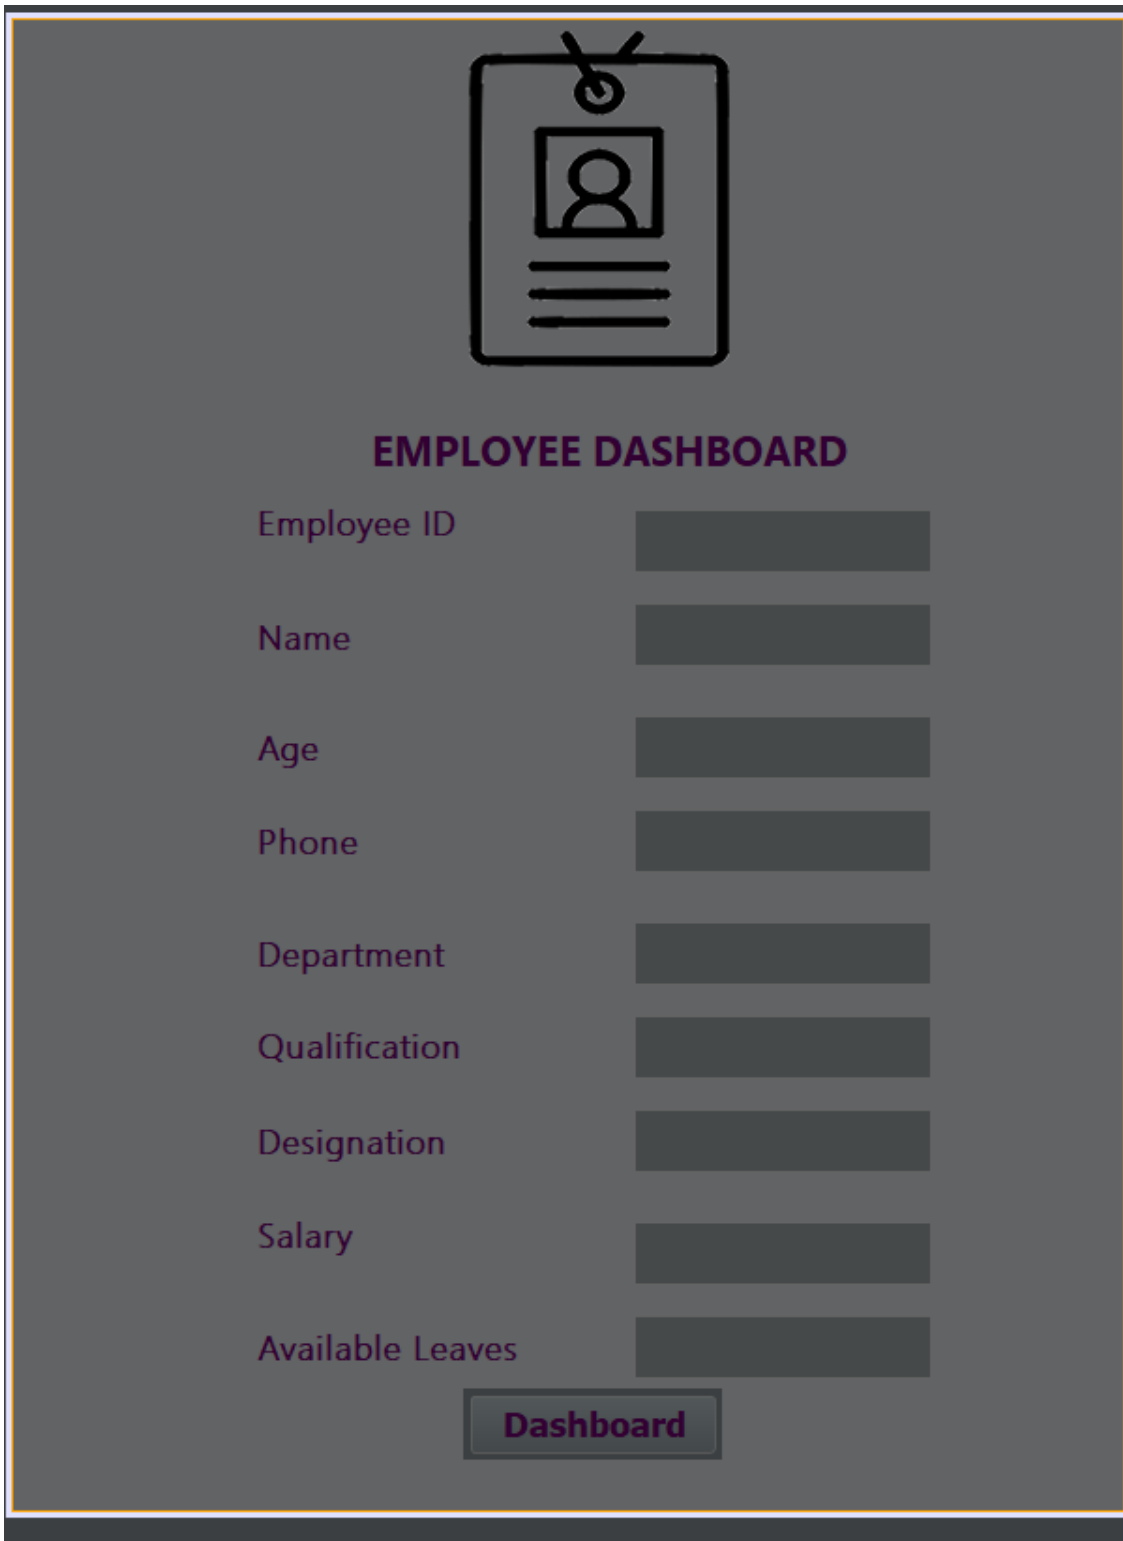

The image shows a login form UI design. At the top, there is a large black circular icon representing a user profile. Below this, the text "USERNAME:" is displayed in a bold, purple font. To the left of the username input field is a small circular icon containing a user silhouette. The username input field is a dark gray rectangle. Below the username field, the text "PASSWORD:" is displayed in a bold, purple font. To the left of the password input field is a small padlock icon. The password input field is a dark gray rectangle. Below the password field, there is a checkbox labeled "Show Password". Below the checkbox, there is a dropdown menu with the text "Admin" and a downward arrow. At the bottom, there is a large button labeled "LOGIN".

EmployeeDashboard.java:

EmployeeProfile.java:

The image shows a graphical user interface for an 'Employee Profile' dashboard. At the top center is a large icon of a clipboard with a person silhouette and a keychain. Below this icon, the title 'EMPLOYEE DASHBOARD' is displayed in a bold, dark blue font. The main area of the dashboard contains a list of nine fields, each with a label on the left and a corresponding input box on the right. The fields are: 'Employee ID', 'Name', 'Age', 'Phone', 'Department', 'Qualification', 'Designation', 'Salary', and 'Available Leaves'. At the bottom center of the dashboard is a button labeled 'Dashboard'.

EMPLOYEE DASHBOARD	
Employee ID	<input type="text"/>
Name	<input type="text"/>
Age	<input type="text"/>
Phone	<input type="text"/>
Department	<input type="text"/>
Qualification	<input type="text"/>
Designation	<input type="text"/>
Salary	<input type="text"/>
Available Leaves	<input type="text"/>
<input type="button" value="Dashboard"/>

AddEmployee:

The image shows a web form titled "ADD EMPLOYEE" with a header icon of three people and a plus sign. The form contains six input fields: Name, Age, Phone, Department (a dropdown menu with "Finance" selected), Qualification, and Designation (a dropdown menu with "CEO" selected). At the bottom, there are two buttons: "Add Employee" and "Dashboard".

Add Announcements:

A screenshot of a web application interface for adding announcements. The background is a dark gray. At the top center is a large black megaphone icon. Below it, the word "ANNOUNCEMENTS" is written in bold, black, uppercase letters. Underneath, there are two input fields: the first is labeled "Admin Name" and the second is labeled "Announcement". At the bottom, there are two buttons: "Submit Announcement" and "Dashboard".

ANNOUNCEMENTS

Admin Name	Announcement
Abdullah	Regarding Schedule Change, All HR Department employees need to know that Job now starts from 9am till 6pm.
Fazeel	sup nibbas
Abdullah	Regarding accounting department, all Employees are informed to take 15 days leave due to Covid-19 measures.
Fazeel332	All work will resume from August 2020
Abdullahw72	pls submit your work

Dashboard

The screenshot displays a web application window titled "CONTACT ADMIN". The background is dark gray with a silhouette of a person in a suit. The form contains the following elements:

- Name:** A text input field containing the text "Fazeel".
- Message to Admin:** A text area containing the text "this is a test message."
- Buttons:** Two buttons at the bottom, "Submit" and "Dashboard".

A "Message" dialog box is overlaid on the form, indicating a successful action:

- Title:** Message
- Icon:** Information icon (i)
- Text:** Message has been sent to an Admin!
- Button:** OK

The screenshot displays a web application interface for submitting complaints. The main form has a dark gray background with a large black icon of a notepad and pencil at the top. Below the icon, the word "COMPLAINTS" is written in bold, purple capital letters. The form contains the following elements:

- A "Department" label followed by a text input field containing "HR".
- A "Complaint" label followed by a dropdown menu showing "Complaint".
- A "Message to Admin" label followed by a large text area containing the text "Please fix the printers".
- Two buttons at the bottom: "Submit" and "Dashboard".

Overlaid on the right side of the form is a "Message" dialog box. It has a title bar with "Message" and a close button (X). The dialog box contains a blue information icon (i) and the text "Complaint Submitted!". At the bottom right of the dialog box is an "OK" button.

ADMIN SCREENSHOTS:

The screenshot displays a web application interface for adding a new employee. The main form is titled "ADD EMPLOYEE" and features a large icon of three people with a plus sign. The form fields are as follows:

Field	Value
Name	Farasat
Age	20
Phone	090078601
Department	HR
Qualification	MS CS
Designation	Manager

At the bottom of the form are two buttons: "Add Employee" and "Dashboard".

Overlaid on the right side of the form is a "Message" dialog box with the text "Inserted!" and an "OK" button. Above the message box is a "Clipboard" window showing a landscape image.

Conclusion

To conclude, this project is a very important aspect of any company as basically every company has some sort of employee management system going on. If it's paper-based, this can easily be a good replacement and a long-term investment for the company. However, there is always room for improvement and thus there are a couple of things that could be improved. Giving users the ability to post their work files, attendance through this software could be the next step. Taking it a step further, we can add a feature of chatting between Colleagues or even Admins. This would help reduce physical or standard communication forms.

Overall, we are very satisfied with how it turned out, and I hope that we were able to impress you in any manner.
